2023

# Moppett

Moppett is a 10-year-old, adorable, Havanese/Shih Tzu blend who we initially met and placed with a family, when she was a puppy. When she came back to us in 2023, we found that she had a history of bladder stones and infections. Although you would never have guessed from her spunky personality that anything was amiss, this sweet, tiny lady had to have surgery to remove seven stones from her bladder. She made a speedy recovery, and met her forever family shortly thereafter. In total, Moppett's care cost was **\$1,553.92**.

# Kiwi

Kiwi is a 4-year-old, Terrier blend that came to us from the Humane Society of Yuma. When he arrived, we realized he had a previous injury to one of his legs. After receiving several veterinary opinions, it was decided that little Kiwi would need surgery to repair his leg. He was a trooper and through regular exercise and physical therapy he worked very hard to gain the mobility back in his leg. Kiwi recovered wonderfully and was adopted in February of this year! Kiwi's total care cost came to **\$2,722.50**

# THE 80 FOR BRADY LADIES

Rita Moreno

Jane Fonda

Lily Tomlin

Sally Field

# The 80 for Brady Ladies

These four sweet, senior ladies were rescued from a hoarding situation earlier this year. Upon examination, we found that they each had medical issues we may not be able to resolve. We started their medical journey with bloodwork. The blood work came back very abnormal, so we started treatments, and they all also appeared to have upper respiratory infections. Unfortunately they all also have collapsing tracheas, which causes a constant cough, and makes some of their ailments impossible to treat. Due to their diagnosis, they were placed into hospice care with a Friends for Life foster home, where they will be pampered for all their remaining days. Their amazing foster helps each of these ladies live life to the fullest! They enjoy spending their time on fluffy dog beds relaxing in front of the fire. Lily, Rita, Jane, & Sally's care cost has thus far come to **\$2,133.11**

# OLIVER TWIST

# Oliver Twist

Oliver Twist is a nine-year-old sweetheart of a Tabby cat who came to us as a stray, after a good Samaritan found him crying on their doorstep. Due to dental disease, he had previously had 20 teeth extracted. We could see he needed more pulled, but could not have guessed he would have a BB removed from his jaw, during the process. Now that Oliver has very few teeth left, he is on a puréed diet which he does not mind one bit! He made a full and speedy recovery and is living the spoiled life with his new family. Oliver Twist's total care cost came to **\$836.22**

**STEVIE THE BOY WONDER  
&  
MARVIN**

# Stevie the Boy Wonder & Marvin

These bonded brothers came to us at only ten days old. Upon arrival, we noticed that there was something different about their eyes, which had not opened yet. The duo visited multiple veterinary specialists, and it was discovered that they both had eye deformities causing blindness. On top of their vision, Stevie was diagnosed with Bilateral Vestibular Disease after showing signs of incoordination and a mostly constant head tilt. Marvin received his own diagnosis of Hypersthesia which causes extreme sensitivity on his back & by his tail. Because of this, Marvin will need to be on life long Gabapentin to help keep that sensitivity low. Their loving foster home has been with them from the beginning and has worked so hard to socialize them and take them to every medical appointment over the last year. These charming boys will soon be looking for a home that enjoys double the fun, as they will need to remain a bonded pair. Thus far, their cost for care has been **\$3,628.97**

ANIMAL RESCUE

Holiday Angels

2023

# Sunshine

The volunteers named this little treasure Sunshine because she's like a ray of sunshine, every time you see her! Sunshine is a one-year-old White Tabby that came to us as a stray. We test all cats for Feline Leukemia & FIV. Unfortunately, Sunshine tested positive for Feline Leukemia (FELV). FELV can be contagious from one cat to another, and although there is a highly effective annual vaccine to prevent FELV, there is no cure, once infected. In some cases, cats with FELV can live a symptom free, healthy life, while others may develop a secondary infection that could impact their lifespan. Sunshine is currently symptom free, and has been living in a loving foster home where she enjoys playing with her favorite mouse toy. Sunshine's medical costs to date are **\$352.69.**

The logo for 'The Farmer's Dog' is a circular emblem with a dark green background. The words 'The Farmer's Dog' are written in a white, hand-drawn, cursive-style font. 'The' is at the top, 'Farmer's' is in the middle, and 'Dog' is at the bottom.
